# LABEL ARCHIVE

LABEL ARCHIVE offers secure approval and label storage for your entire organization. Specifically designed to integrate with CODESOFT, LABEL ARCHIVE's features follow your label from initial design approval to final distribution and everything in between, giving your business the ability to comply with multiple industry standards. LABEL ARCHIVE eliminates manual processes surrounding label format approval and also helps eliminate user error by allowing printing of only approved labels.

## The Advantages of LABEL ARCHIVE

- **Compliance** – 21 CFR Part 11 compliance requires security, traceability, and version control. LABEL ARCHIVE provides the functionality you need to meet FDA and other industry standards.

- **Approval** – Choose which label is ready for production and deny designs that aren't. Eliminate errors with LABEL ARCHIVE's instant notification capabilities through e-mail. When a label is created and submitted, you are alerted instantly.

- **Security** – LABEL ARCHIVE allows administrators to have the ability to easily create and maintain user groups and establish permissions to control access.

- **Traceable** – The system captures and reports on changes, comments, revisions, and print history for every label in your system.

User Groups With Defined Rights To Control Access

Reprint Labels That Have Previously Been Printed

Key Features in LABEL ARCHIVE

- **Seamless Reprint Capabilities** – This feature allows you to maximize your productivity by printing previously printed labels, skipping the process of having to resend print jobs.

- **Monitor Revision and Print History** – See who did what and when they did it to provide your company with full traceability.

- **Lock Previously Approved Labels** – Provides and additional layer of security by locking labels so users can only access the approved version.

- **Mass Import** – Allows users to import multiple labels into LABEL ARCHIVE at once, saving time.
